Farrukh Feroz

Senior Frontend Developer | Karachi, Pakistan
+92 342 3697528 | farrukhferoz12@gmail.com | linkedin.com/in/farrukh-feroz | github.com/farrukh191

Summary

Frontend developer with 4+ years of experience in React.js, Vue.js 3, Angular, Ionic and TypeScript, delivering web, desktop and hybrid mobile applications. Hands-on with monorepo and micro-frontend codebases, reusable component libraries, REST API integration (40+ APIs), localization, analytics, and secure third-party integrations (Plaid, Stripe). Experienced in AI-assisted development with GitHub Copilot, OpenAI Codex and Cursor, and in workflow automation with n8n.

Experience

Senior Frontend Developer May 2022 – Present
Nisum *Karachi, Pakistan*

- Built scalable web applications with Vue.js, React, Node.js and Express.js, including phygital commerce platforms for designing, visualizing and sharing interior and exterior spaces.
- Delivered features in a monorepo and micro-frontend architecture on the WSI project alongside cross-functional teams.
- Implemented secure third-party integrations, including Plaid SDK and hosted banking and payment flows.
- Built analytics to track user behavior, engagement patterns and revenue-generating pages.
- Developed reusable UI components and integrated 40+ REST APIs across projects.
- Improved performance, maintainability and localization support across multiple brands and regions.
- Supported UAT, production deployments, troubleshooting and post-release stabilization for business-critical modules.
- Used GitHub Copilot, OpenAI Codex and Cursor for development, refactoring and debugging; automated repetitive workflows with n8n.

Associate Frontend Developer Dec 2021 – May 2022
Aim Solutions *Karachi, Pakistan*

- Enhanced existing applications across web, desktop and mobile using React, Angular, Ionic, Capacitor and Electron.js.
- Developed reusable UI modules and resolved production bugs for stable releases.
- Worked with SQA to reproduce and resolve defects; took part in code reviews to improve maintainability.

Projects

Williams-Sonoma, Inc. (WSI) | *Vue.js 3, Vuex, Monorepo, Micro-frontends* Feb 2026 – Aug 2026

- Phygital commerce platform for digitally designing, visualizing and sharing interior and exterior spaces, with analytics and localization across brands and regional markets.
- Implemented language selector support for CAN and US markets across eight brands; integrated analytics for user behavior and revenue-generating pages.
- Delivered features across shared packages and independently deployed modules; improved reusable component architecture; supported UAT and production releases.

Progleasing (PROG) | *React.js, Material UI, Node.js, Express.js, Plaid SDK* Dec 2025 – Jan 2026

- Built frontend features and implemented Plaid SDK and Hosted Link integrations for secure bank connectivity, including flows inside WebViews.
- Evaluated SDK-based and hosted approaches and documented their differences to guide implementation decisions.

Galaxefi | *React.js, Redux, Ant Design, Axios* Mar 2022 – Aug 2022

- Responsive web applications with real-time shipment tracking, automated invoicing and digital documentation workflows.
- Integrated 40+ REST APIs; developed 17+ reusable custom components and 20+ custom components; refactored the codebase for scalability and performance.

Causevest | *React.js, Electron.js, Redux*

- Developed multiple components for a crypto wallet desktop application and optimized desktop workflows.

Clara Carbon | *Ionic, Angular, Capacitor, Stripe*

- Built the dashboard, signup and product listing modules of a cross-platform mobile app; integrated the Stripe payment gateway.

Automated AI Code Reviewer | *Node.js, GitHub API, Gemini API* Personal project

- AI-powered pull request review system using LLMs and the GitHub API; implemented diff parsing and automated inline review comments.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP, SQL
Frontend: React.js, Vue.js 3, Angular, Ionic, Vuex, Redux, Material UI, Ant Design, Tailwind CSS
Backend & Data: Node.js, Express.js, Apache Tomcat, MySQL, SQL Server
Architecture: Monorepo and micro-frontends, reusable component libraries, REST API integration, i18n
AI & Automation: GitHub Copilot, OpenAI Codex, Cursor, n8n, LLM APIs (Gemini), GitHub API
Tools: Git, GitHub, GitLab, Jira, Confluence, Vite, Webpack, Capacitor, Electron.js, Postman, Swagger
Integrations: Plaid, Stripe, Axios

Certifications

AI Builder: Create Agents, Voice Agents & Automations in n8n Oct 2026
Udemy (instructors: Ligency, Ed Donner) | 14.5 hours *Verify certificate*

Education

Federal Urdu University of Arts, Science and Technology 2021
Bachelor of Computer Science *Karachi, Pakistan*
